

Chinese Herbal Formulas to Protection and Support the Respiratory Tract

TO ORDER 508-650-1921

Following the infections in Wuhan the Chinese Government promoted prevention programs and support formulas, from their hard-earned experience integrating Chinese Herbal Medicine in the treatment of 85% of all COVID 19 patients in Hubei.

After a review of literature included in the article... *Integration of Traditional Chinese Medicine in the Treatment and Support against the Coronavirus (COVID 19)*. The main principles of TCM use were to tonify energy (qi) to protect from external pathogens, disperse wind and discharge heat, and resolve dampness.

ANDRO-PROTECT FORMULA, (Yu Ping Feng San)

This is probably the most famous prevention formula from TCM literature, for the prevention of respiratory infections and was handed out to Chinese healthcare workers in the SARS epidemic and the Covid 19 pandemic. With the addition of an “anti-toxin” and “heat-clearing” herb such as my favorite.... Andrographis Paniculata (10)(17)

IMMU-HEALTH FORMULA (Huang Qi Dong Qing Pia)

This is inspired by *Fu Zheng* therapy research in China. Fu Zheng means to “support the normal or righteous qi” to protect the body from adverse influences, often used to nourish and support

cancer patients. Appropriate for supporting immune function when challenged by any illness where there is a weakened immune system or weakened immune response. (14)

FIRST DEFENSE FORMULA (*Yin Qiao San*)

The first formula is extremely popular in Japan as a cold and flu preventative. It frees the chest, supports the 'qi', resolves phlegm, and drains heat from the lung. (12) *Yin Qiao* Formula is an anti-toxin/anti-viral formula with the two main herbs used to modify the formulas used to prevent SARS. (13)(24)

INHIBIT FORMULA (*Shuang Huang Lian Wan*,)

The other two major ingredients from the literature review are included with Scute in this classic Formula, it's a popular Chinese formula that Chinese use as a natural alternative to antibiotic for viral infection in colds and flu. This formula sold out in China online and in stores, after the official Xinhua News Agency published an article (in Chinese) that claims the herbal remedy offers hope as a COVID-19 treatment. Xinhua the news agency reported Friday that the Shanghai Institute of Materia Medica and the Wuhan Institute of Virology had discovered that the *Shuang huang lian* oral li quid -- a popular combined herbal remedy commonly used to relieve some symptoms such as fever, cough, and sore throat -- could be used to "inhibit" the deadly virus.(11)(17)

DEEP LUNG FORMULA, (Qing Fei Pai Du Tang.)

Supports Respiratory Function & A Normal Body Temperature

When suddenly you feel a sensation of heat in your forehead. Your throat is scratchy. Walking a short distance seems like running a marathon. Excess fluid buildup inhibits the normal gaseous exchange of oxygen and CO2 in the tissues. In other words, you can no longer breath

normally. If the tissues are saturated with mucus, it becomes very difficult to clear. At this stage, your immune function may not be able to clear the deep lung. In China this formula showed it could ventilates the lungs, releases the exterior, clears heat and phlegm, and promotes water removal.
